

## Data Sheet

# VIAVI SmartOTDR Handheld Fiber Tester

The affordable, easy-to-use handheld tester for techs at any level

The lightweight and compact SmartOTDR speeds and optimizes field testing of metro and access networks with a tailored OTDR interface and automatic analysis that any technician can understand.

With SmartOTDR, generic or user-defined setup configurations eliminate setup errors and maintain results consistency. One-touch operation and a single results window ensure fast and easy measurements, while robust wireless connectivity options increase productivity anywhere.

# **Benefits**

- Combines all essential fiber tests in one handheld with visual fault locator (VFL), optical power meter (OPM), and P5000i microscope options
- Simplifies OTDR analysis with Smart Link Mapper (SLM) result view
- Upgrades easily in the field
- Automates testing with objective, pass/fail results
- Enhances productivity anywhere with powerful network connectivity options)

### **Features**

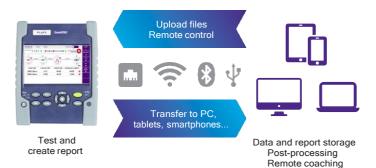

- Single-/dual-/tri-wavelength versions with 1310/1550 nm and in-service 1625 or 1650 nm wavelengths
- Light, compact, hands-free design includes 5" high-visibility outdoor touch screen
- Integrated CW light source
- PON optimized to test through 1x128 splitter ratio with FTTH-SLM
- Built-in broadband and dual-band selective power meter (1490/1550/1577 nm)
- Automated fiber inspection and macrobend detection with pass/fail analysis software
- 3G/4G connectivity via USB, Bluetooth®/ WiFi options
- 1-year warranty\*
- All-day battery life

\*Except 100AS version

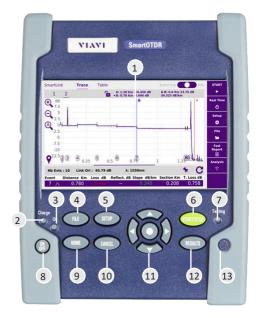

# **Powerful Connectivity**

Several connectivity options (3G/4G smartphones via USB and optional Bluetooth/WiFi) enable remote control as well as data and work-order transfers toand-from tablets, smartphones, and computers. The SmartOTDR quickly resolves field issues in real time, and optional SmartAccess Anywhere (SAA) can open a tunnel in the cloud so a technician can remotely access and operate the instrument. Compatible with a wide range of cloud servers (WebDAV service providers), the SmartOTDR can also instantly share measurement reports using onboard FastReport .pdf report generation.

SmartOTDR includes a one-year trial of cloud-based StrataSync<sup>™</sup> for asset, configuration, and test-data management, and to ensure that all instruments have the latest software and options installed.

Connectivity features and options enhance workflows

- 1. 5-inch high-visibility capacitive touch screen
- 2. Charge indicator
- 3. On indicator
- 4. File menu
- 5. Setup menu
- 6. Start/Stop
- 7. Testing indicator
- 8. On/Off
- 9. Home page
- 10. Cancel (switch off functions)

- 11. Direction and validation keys
- 12. Results page
- 13. Loudspeaker
- 14. AC/DC input
- 15. Slave mini USB port
- 16. Visual fault locator (VFL)
- 17. Master USB ports
- 18. OTDR port/continuous light source/power meter
- 19. OTDR live port (in-service test)/dual-band power meter
- 20. WiFi/Bluetooth options

# Specifications (typical at 25°C)

| General                                 |  |                                  |                                |  |
|---|--|----------------------------------|--------------------------------|--|
|   | E inch consoitive color touc   | h coroon (12 E cm)               |                                |  |
| Display                                 | 5-inch capacitive color touch screen (12.5 cm)   |                                  |                                |  |

| Measurement ranges                      |  | 3m; 1550/1577 nm: –35 to +23 dBm |                                |  |
| Measurement accuracy                    | ±0.5 dB  |                                  |                                |  |

1. Per Telcordia GR-196-CORE.

2. Laser at 25°C and measured at 10  $\mu s.$ 

3. The one-way difference between the extrapolated backscattering level at the start of the fiber and the RMS (SNR=1) noise level, after 3 minutes of averaging using the largest pulsewidth.

4. Measured at  $\pm 1.5$  dB below the peak of an unsaturated reflective event using the shortest pulse width.

5. Measured at  $\pm 0.5$  dB from the linear regression using a FC/UPC-type reflectance and the shortest pulse width.

6. ±1 dB.

7. After light source stabilization, warm-up time of 20 min.

8 At calibrated wavelengths and at -30 dBm.

9. Not available on filtered wavelengths

# **Ordering Information**

| SmartOTDR Configurations  | Part Number                  |

| Additional Software Options   |                              |
| Addition of 1310 nm wavelength (E100A and E100AS versions only)   | E113-UPG                     |
| SmartLink Mapper/SLM view (E100AS version only)   | ESMARTLINK100UP              |
| Increased Dynamic Range - 37/35 dB at 1310/1550 nm (E100AS version only)  | EXTRANGE100UP                |

 $^{\ast}$  For ordering in the USA replace E for F in the part number, e.g. E100AS-PC becomes F100AS-PC

# **VIAVI** Care Support Plans

#### Increase your productivity for up to 5 years with optional VIAVI Care Support Plans:

- Maximize your time with on-demand training, priority technical application support and rapid service.
- Maintain your equipment for peak performance at a low, predictable cost.

Plan availability depends on product and region. Not all plans are available for each product or in every region. To find out which VIAVI Care Support Plan options are available for this product in your region, contact your local representative or visit: <u>viavisolutions.com/viavicareplan</u>
